

MODERNIZE YOUR DATA CENTER

ENSURE YOUR DATA CENTER WILL BE YOUR CENTER OF TOMORROW

With new market demands driving an emphasis on application availability that is outpacing legacy data center design, it's imperative that IT leadership starts to plan a transition to the next generation data center.

GLOBAL DATA CENTER TRENDS

TRAFFIC, WORKLOAD PLACEMENT, APPLICATIONS AND SECURITY ARE ALL TOP OF MIND TRENDS IN THE DATA CENTER:

Global data center traffic will nearly **TRIPLE** over the next **FIVE YEARS***

By 2018, more than **75%** of workloads will be processed by cloud data centers and workloads per physical cloud server will grow **44%***

78% of CIOs surveyed say that the network is more critical to delivering applications than just last year

The annual cost of cybercrime to the global economy ranges from **\$375B** to **\$575B** in losses

THESE TRENDS ARE FOSTERING AN EVOLUTION TOWARDS NEXT GENERATION DATA CENTERS THAT ARE:

SIMPLE

Enable more visibility and faster application deployment without compromise

SCALABLE

Deliver future-proof scale and agility for a better IT user experience

OPEN AND SECURE

Embrace ecosystems in an open and secure approach

Are You Ready for the Next Logical Evolution of the Data Center

AS TRENDS ARE PUSHING FOR A SIMPLE, SCALABLE AND OPEN DATA CENTER, ORGANIZATIONS MUST CONSIDER WHAT THEIR DATA CENTER WILL NEED TO SUPPORT:

CONVERGENCE & AUTOMATION

As the data center grows, so does complexity. Next generation data centers will be built on converged systems so organizations can automate and manage their entire IT infrastructure through a single platform.

APPLICATION CENTRIC INFRASTRUCTURE

As application delivery becomes more crucial to supporting the business, applications will become the focal point in supporting and automating IT.

CLOUD COMPUTING

As more mission-critical workloads are moved to the cloud, your data center architecture will be the underlying foundation to it all, and must integrate with internal and public cloud services.

BY ADAPTING TO THIS EVOLUTION AND MODERNIZING THE DATA CENTER, ORGANIZATIONS CAN:

Enable IT to focus on driving business growth by supporting lines-of-business

Enable IT to work as an agile, on-demand enterprise

Increase IT performance while reducing costs

Innovate, while doing more with less

It's Time To Modernize Your Data Center With SyCom

* Cisco Global Cloud Index: Forecast and Methodology

PARTNERED WITH INDUSTRY LEADERS

TOP NOTCH ENGINEERS

20+ YEARS IN EXPERIENCE

DATA CENTER FOCUSED PRACTICE

CONTACT US TODAY so we can work with you to create an architectural roadmap to modernize your data center. We'll ensure that your data center truly becomes the center of your tomorrow.
