

Security Advisory

03.07.2018

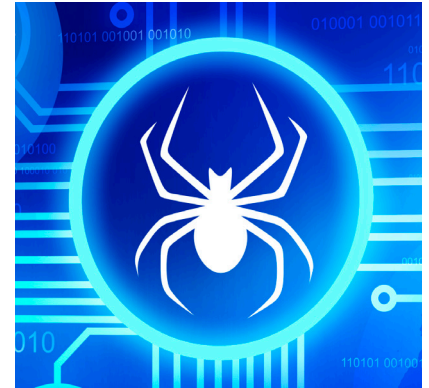

SUMMARY

Cisco has released several updates to address vulnerabilities affecting multiple products. A remote attacker could exploit some of these vulnerabilities to take control of an affected system.

VULNERABILITY DETAILS & ACTION PLAN

US-CERT (United States Computer Emergency Response Team, a division of Homeland Security) encourages users and administrators to review the following Cisco Security Advisories and apply the necessary updates:

1. Cisco Prime Collaboration Provisioning Hard-Coded Password Vulnerability
