

Security Advisory

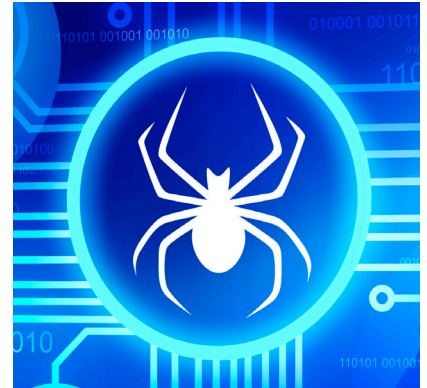

08.08.2018

VULNERABILITY DETAILS & ACTION PLAN

VMware has released security updates to address a vulnerability in **Horizon 6, 7, and Horizon Client for Windows**. An attacker could exploit this vulnerability to obtain sensitive information.

SyCom encourages users and administrators to review the VMware Security Advisory [VMSA-2018-0019](#) and apply the necessary updates.

Need help?

SyCom will be happy to assist with remediation efforts related to any vulnerability your business might experience.
