

Essential Security Program (ESP)

What is the Essential Security Program from SyCom?

The Essential Security Program was developed by SyCom to assess an organization's IT security posture. Using a modular and scalable approach, ESP focuses on three distinct areas to mitigate business technology risks.

The SyCom ESP Approach

SyCom's Essential Security Program leverages industry standards and regulatory compliance guidelines like NIST 800-53, ISO 27002, PCI-DSS, HIPAA, and CIS Critical Controls.
