

Prime Workplace: Desktop in Azure Solution

= SyCom
Connected.

BUSINESS REQUIREMENTS

- Increasing number of employees working remotely.
- Significant user data and key applications hosted in Azure or another service provider.
- Limited ability to build and support virtual desktop infrastructures.
- Desire familiar Windows 10 desktop regardless of user's endpoint.

IDEAL END-USER EXPERIENCE

- Windows 10 single or multi-user desktops, cloud-based virtual desktops easily scale to accommodate a fluctuating workforce and ensure positive user experience.
- User connects to a secure gateway, encrypts data between the connection points.
- Virtual Desktops can be monitored, reported, and remediated without affecting the production environment.

MORE SECURE

- Remote worker no longer has direct access to corporate network.
- Endpoints can be configured to not store corporate data directly for better security.
- Extends standardized security protocols to any device.
- Access hours can be controlled to systems and resources.
- Granular control to allow workers access to only what they need.

EASY TO MANAGE

- Rapidly deploy and scale solution to corporate devices, BYOD PCs, and mobile devices.
- One management point for images, updates, and patching for Virtual Desktops.
- End-user device operating system agnostic.
- Ability to monitor activity and productivity on virtual machines.

QUALIFICATIONS AND RESTRICTIONS

- Networking connected to customer application source.
- Customer has Azure Subscription, or SyCom can provide.
- Customer has Microsoft 365 subscription, or SyCom can provide.
- Customer has Azure AD Connect or Azure AD Domain Services, or SyCom can provide.
- Supported operating systems: Windows, MAC, iOS, Chromebook, or Android user endpoints.
